Subject: Microsoft Settlement

America is the land of opportunity in which your future lays in your hands. Granted Microsoft has engaged in very tough marketing practices in a very cut throat business. Welcome to America where the best are the best and second place is second place. The competitors of Microsoft are trying to use the Justice Department to restrict the leader to gain marketshare. If the actions that Microsoft's competitors are taken then a precedent will be set that will lead to other outrageous lawsuits clogging the courts and harming the free market. There is nothing stopping anyone from developing and deploying a better software than Microsoft. It is just no one has developed a better software. When that is done and history leads us to believe it will be done then America will have a new #1 software company. Stick to what Microsoft has done wrong and apply constraints to Microsoft to prevent just those areas of operation are not repeated.
